Report of First Comptroller Matthews WASHINGTON, Oct. 29.—First Comptroller Matthews, in his report, states that 20,523 accounts, involving \$5,259,-294,594.08, were examined in his office 294,594.08, were examined in his office during the past year. Attention is also directed to the fact that many government officials hold two or more offices, and receive a salary for each. He says:

"It is not a question for the treasury department to determine how many offices one person may hold, or how many salaries he may receive; that many salaries he may receive; that question is entirely with congress, but it is important that the compensation to be paid and the number of offices a person may hold should be clear and well-defined, to the end that illegal payments shall not be made."

Comptroller Matthews, in discussing 'state claims," asks that a limitation be placed by congress upon the time they may be filed, and says until congress acts in the matter he will not re-

ceive claims past due twenty years.

He recommends that the appropriation known as the "deposits by individuals for securing public lands" be covered into the treasury, as the large balance is a constant menace and a standing invitation for the presenta-

on of fraudulent claims.

The collection of balances due the government comes in also for atten-tion, and Comptroller Matthews asks that this class of accounts be stated

wastinaton, Oct. 20.—The experiments made by the United States fish commissioner in 1889 and 1890 with trout in the waters of the Yellowstone national park have proved successful. The commissioner sent Prof. Everman to the region last summer to ascertain the results of the planting, and has received from him a report to the effect that specimens were obtained of brook, Look Leven, rainbow and black spotted in the stocked streams, all of them in excellent condition, and conveying information of the presence of Von Behr trout in Nez Perces creek. The brook and Loch Leven trout, were planted in 1889, spawned in 1890, and some of their progeny were collected. Shoshone and Lowis lakes were stocked in the fall of 1890 with lake and Loch Leven trout. The latter species were found in goodly numbers in the mouth of Heron creek, tributary to Shoshone lake, and Mr. Elwood Hocker, the well-known guide in the antional park, saw trout rise in Shoshone Cotober 7, about seventy-five trout in the Nez Perces creek October 9. The evidence of the success of transplanting is therefore, conclusive and encourages renewed efforts in the

A PERFECT COUNTERFEIT, And One of the Most Dangerous Ever Uttered in the History of Money Making.

MINNEAPOLIS, Oct. 29—One of the most daugerous counterfeits ever uttered in all the long history of money making in America has made its appearance in Minneapolis. It has been found at one other place in the country, Columbus, O., but so wondrously well executed is it, that even experienced bank men are fooled when it reaches

their fingers
The other day a young man in the fetropolitan bank, E. R. Gaylor, as istant cashier, was receiving money rom one of the customers of the bank It happened that in the deposit were a number of \$3 bills. In passing them through his fingers one of them attracted his attention and was laid aside. The spotted bill turned out to

be one of this very dangerous class. The bill was placed in the hands of J. V Lawrence, the special agent of the Inited States treasury department and was by him sent to Washington.
Mr Lawrence pronounces it the most
perfect counterfeit he has ever seen.

THE DETROIT AFLOAT

Launched From the Columbian Iron Works Yesterday,

GLIDING GRACEPULLY INTO THE WATER

Without Hitch or Accident-Description of the Vessel-Her Dimensions. Speed and Cost-Similar to the New Chilian Cruisers.

Baltimore, Md, Oct. 29.—The steel cruiser Detroit, the largest ressel ever constructed in a Baltimore shipyard, was launched from the Columbian iron works at 3:40 o'clock yesterday after-noon. She slid into the water gracefully and without a hitch.

The vessel presented a beautiful ap

pearance lying on the ways, guily be-decked with bunting. From he bow flew the union jack, and at the stern the American colors were proudly unfurled to the breeze. A rope was stretched 20 feet above the deck from bow to stern and the colors making up the international code of signals were ficating from it, reaching the entire length of the rope.

At the bow of Uncle Sam's new ves-

sel a stand was erected for the use of the little sponsor, Florence N. Malster, the 4-year-oldidaughter of the presiden of the Columbian iron works, and her attendants. The sides of the stand were hid from view by the flags of various nations, gracefully draped.

Until the last minute it was expected

that Secretary Tracy of the navy and other heads of departments would arrive from Washington to witness the launch. They did not, however, put in an appearance. There was a great crowd present nevertheless, who cheered the handsome vessel as she left the ways. The Detroit is one of three sister

ships of 2,000-tons each, for which bids were accepted in November, 1889. It is a point of interest that this 2,000-ton vessel is almost identical in displacement with the two Chilian ernisers Presidente Errazuriz and Presidente Pinto, built in France, of which so much has lately been heard. The Chilian craft are, however, rather longer and narrower, having a length of 268 feet and a breadth of 25% feet, whereas the Detroit and her mates are 257 feet on the load water line and have an extreme beam of 37, with a mean normal draught of 14% feet. The latter also are only guaranteed to make seventeen knots an hour, whereas the Callian vessels are nineteen-knot ships The chief interest of scientific peo-ple is centered in the outcome of the speed trials, in which the new cruisers are expected by the builders to earn

the handsome premium of \$150,000.

Congress limited the cost of each of these three vessels to \$700,000 for a guaranteed speed of seventeen knots. Certain allowances will, however, per-mit the contractor to receive an addi-tional \$150,000 on each vessel if nine-

teen knots should be made. A failure to reach sixteen knots rejects the vessel. The Detroit and No. 9, which will be lauched in a few weeks, are what are termed twinscrews coal-protected cruisers. Both have a watertight deck extending the entire length of the vessel. They have an extra long forecastle and poop deck under the ends of which are spaces al-lotted for working the broadside guns and torpedo apparatus. The Detroit has what is termed an oper gun deck, the poop and forecastle decks

gun deck, the poop and forecastle decks being connected by a bridge extending fore and aft. There is extended through the principal part of the ves-sel a center-line vertical bulk head, which not only helps to support the water-tight deck, but adds great strength or "backbone" to the vessel. It also divides the vessel into water-bult compartments. Especially interesting is the coffer-

am protection along the entire machinery space, to be filled with cellulose. The Detroit will be the first vessel in our navy to carry this water-excluding belt, whose efficiency has been practi-cally tried in several navies, and notably of late in the Danish vessel Helda. Cellulose is manufactured from the fibers of cocoanut busks, and has the property of absorbing eight times its weight of water. The French government proved by tests that ships built with a lining of cellulose would be practically unsinkable. There will be 500 cubic feet of cellulose in the cofter damage in the Detroit. Her sister fer-dams in the Detroit Her sister 9 and 11 will be similarly

The seventh round was a rough and tumble affair of the most approved style, consisting of choking, biting, kicking, gouging, and all kinds of unfair fighting. Daley, who started the foul fighting, got decidedly the worst of it. He finally ran out of the ring to become supplement, but he was thrown escape punishment, but he was thrown back again by his friends and told to take his medicine. He made several more attempts to make his escape, but each time he was headed off by the crowd and pushed back into the ring. The eighth and last round was of short duration. All the fight had been punched out of Daley, and his only air seemed to be to get out of the ring and as far away from the fists of Bates as possible Finally in his mad effort to escape, he smashed Con McAuliffe in the face and dived out through the

THURSDAY EVE., OCT. 29, 1891.

The Democratic Press The Democratic press, true to its dis certion to be against its own country in ny controversy as between this country and a foreign one, with great unanimity is coming out against the government in the Chilian controversy and are giv-ing aid and comfort to the Chilians. Here is a sample of Democratic literaure from the St. Louis Post-Dispatch:

This is an effort to discredit a minister epresenting the United States Governthis, for it advises Chili to order him out of the country. Should Chili act upon this advice it is fair to assume that the

Democratic press would support Chilass against the United States. There is no oetter reason for assuming such an atta tude than that the present administraion is not Democratic. In this respect how different the conduct of the Repubioan press when the administration was Democratic. The Republican press and dministration, on the side of their own country. Republicans cannot harmon-

The most casual glance at the above will convince the reader that this Demooratic paper has gone out of its way to misrepresent its country. The New Orleans case and the Valparaiso case are un'ike. In the Valparaiso case Chiliana attacked American sailors in uniform, which was tantamount to attacking the

resided and had been doing business in that city, were ki'led by a mob. It was not known until after the mob's work had been done that they were not citizers of the United States. There was nothing about them to indicate that they were Italian citizens. They did not represent the Italian government in New Orleans, while the United States sailors represented the United States in Valpafact, and there could have been no mistuke as to that fact. The attack on the Italians in New Orleans, under the cirumstances, could in no way be construed as an insult to the Italian government. The attack upon United States States sailors in uniform at Valparaiso could be construed in no other way than

This is the plain difference between the two cases, and yet when the Democratic press wants to stab the government under which it is protected it re uses to recognize the distinction between the two cases. It would improve the Democratic press were it to support its own Government for a while, and might serve to create some confidence in its

The Review now invents its own facts REPUBLICAN to name a list of goods on which the price has been advanced by the business men in Decatur selling them. It says the business men of Deadvanced. This is an idea manufactured in the Review office. When alien importers were sending out circulars last summer, before the McKinley hill went into effect, showing great lists of goods on which advances would be made on account of the McKinly bill, for campaign purposes, the Review had no trouble to get its lists from Decatur merchants for publication. If the prelictions of these circulars have been realzed,it is nonsense to claimthat merchants ow refuse to have that fact verified by llowing the Review to publish a comparative statement of prices before and

see the new tariff law came into effect. But the Review knows very well that goods, instead of having advanced, have lectined in price, and that is what harts the Review. That fact strikes the free traders like a cyclone with force enough to blow the feathers off the free trade carable case of catarrh, no matter how had, or of how long standing. They'll carry it out, too. It's one thing to make the offer. It's a very different thing to make it good. It couldn't be done, except with an extraordinary medicine. But that's what they have. By it's mild, soothing, cleansing and healing properties, Dr. Sage's Remedy cures the worst cases. It doesn't simply palliate for a time, or drive the discusse to the lungs. It produces a chicken. Suppose, however, the Decatur merchants that goods have advanced under the McKinley bill, as it claims, surely the fellow who has been "robbed" could

be induced to squeal, and thus aid the Review in its efforts to hold that the duty is added to the cost of the goods. This whole business, on the part of the Review, is a piece of downright nonsense and child's play to bolster up and recover steel from the advocacy of a theory that has been exploded by the operations of the McKinley law.

Campbell Got Angry. At a meeting in Laverpool, O., last Thursday Gov. Campbell lost his temper nd made a disgraceful exhibition of himself because the Republicane in his audience, who, by the way, were in the majority, cheered limitily when he referred to McKinley as the champion of protection. Instead of taking his medicine like a man he denounced the mayor, who precided at the meeting, for not keeping order, and said many ugly things about the town, declaring that he would roset it wherever he went in the campaign He also said some hard things about the pottery industries in the town, which brought out the following open letter to FOR SCROFULA

The assault to kill case at the church shere Rev. A. Q. Gharrett was preaching Sunday night was printed in these col-umns Monday. The Taylorville Republican gives additional particulars as fol-

lows:

On Sunday evening last at a church in Greenwood township, saveral miles east of Morrisonville, Hiram E. Huffman was assaulted by Roy Skinner, who struck Huffman a powerful blow with a large wrench. The attack was made by Skinner reaching over a bonch and striking his victim an overhanded blow on top and a little forward of the center of his skull, but it proved to be a glanoing blow resulting in breaking through the skull in two places and otherwise splintering it, but, strange to say, it did not even stagger Huffman. Dr. Reasoner, of Morrisonville, attended the wounded man and removed several pieces of bone, and yesterday Huffman was in our city and had the wound examined and dreased by Dr. J. J. Firsy, who says it is not necessarily dangerous. Skinner's whereas botus is not known, but Deputy Sheriff Britton is on his trail and he is likely to soon be apprehended. TROUBLE AT MACON.

An Injunction Against Building Water Works on Illinois Central Ground.

Some time ago the city council at the

town of Macon, 12 miles south of Decatur, concluded to engage in the laudable undertaking of giving the city proper protection against fire. It was decided to build water works, using the tank and well system. The contract was let to erect a building on the right of way of the Illinois Central Railroad Company, to which many of the tax payers have entered a vigorous remonstrance. The objectors allege that the city council has not adopted an ordinance for the proosed improvement and that it is folly to build the works on ground to which the city has no title and can never acquire it. The proposed building will cost abou \$1,000 and it will cost \$8,000 to \$10,000 to extend the pipes through the streets of the town. The objectors want the water works built, but they protes against putting the building on ground not owned by the city. To-day S. G. Washburn, Daniel Patterson and others came to Decatur and took the necessary stops to stop further proceedings by filing a petition for an injunction. The case

Against the Wabash

Some time ago John R. Lockridge, o Pawnes, Sangamon county, administrator of the estate of John and Mary Molphan, who were killed by a train on the Wabash railroad, was awarded \$6,000 damages in the circuit court in a suit against the 'railroad. The case was taken to the Appellate and Supreme Courts by the defendant and the decis ion of the circuit court was affirmed The case was then taken to the United States Supreme Court on the ground that a federal question was involved. The attorneys for the plaintiff have been no tified that the United States Supreme Court has dismissed the appeal.—Spring-
